

Paul Sereno

Paleontologist

Dr. Sereno is a professor of paleontology at the University of Chicago and a National Geographic "explorer-in-residence" who has discovered several new dinosaur species on several continents, including at sites in Inner Mongolia, Argentina, Morocco and Niger. One of his most widely publicized discoveries is that of a nearly complete specimen of *Sarcosuchus imperator*, popularly known as SuperCroc, at Gadoufaoua in the **Tenere** desert of Niger.
