

## **Dr. Andrew Hipp**

Botanist

As senior scientist in Plant Systematics and Herbarium Curator at The Morton Arboretum, Andrew Hipp, PhD, conducts and directs research that addresses the origins and evolution of plant diversity, using the tools of molecular systematics, genomics, field ecology, and herbarium study. Current research in the Hipp Lab focuses on oaks (*Quercus*, Fagaceae), sedges (*Carex*, Cyperaceae), and the use of phylogenetic and trait diversity to inform questions in ecological restoration and community ecology.
